VARIABLE ALUMINIUM CORNER

FROM 90°
TO 135°

A technical diagram showing a cross-section of a variable aluminium corner joint. The joint is shown connecting a horizontal aluminium profile to a vertical one. A dashed curved arrow indicates the adjustable range of the corner, from 90 degrees to 135 degrees. The profiles have a complex internal structure with multiple chambers and a central pin mechanism that allows for adjustment. The background is a light grey gradient, and the joint itself is a dark grey color.
