BOREALIS

INTRODUCTION

Borealis is a modular seating and table system designed by Snøhetta and manufactured by Citterio, conceived to flexibly respond to the needs of lounges, waiting areas, and contemporary work environments. The encounter between wooden planes and upholstered volumes with soft yet precisely sculpted shapes gives life to a collection that embodies comfort, craftsmanship, and refined Nordic-inspired design.

The structure, based on wooden profiles and panels, defines a modular logic built on a square matrix, from which a comprehensive range develops:

- Armchair, with or without armrests
- Two- and three-seater sofas, with or without armrests
- Upholstered benches in two depths
- Rectangular and square tables

Each element is designed to ensure dimensional consistency and configurability, whether as stand-alone pieces or in serial compositions.

Comfort is guaranteed by differentiated-density padding, a system of elastic straps beneath the seat that enhances ergonomic performance, and the refined execution of the cushion stitching, which emphasizes the collection's sartorial elegance.

Particular attention is dedicated to the finishes: the wooden planes, available in brushed oak natural or coffee, are complemented by the complete range of Citterio fabrics, enriched with a new wool textile available in four colorways.

The system is completed by round chrome feet, which elevate the upholstered volumes and underline the collection's elegant and understated design.
