BOREALIS

INTRODUZIONE

Borealis è un sistema modulare di sedute e tavoli, progettato da Snøhetta e realizzato da Citterio, concepito per rispondere in modo flessibile alle esigenze di lounge, aree d'attesa e ambienti di lavoro contemporanei.

L'incontro tra superfici lignee e volumi imbottiti dalle forme morbide ma precisamente scolpite dà vita a una collezione che unisce comfort, maestria artigianale e un design raffinato di ispirazione nordica.

La struttura, basata su profili e pannelli in legno, definisce una logica modulare fondata su una matrice quadrata, dalla quale si sviluppa un'ampia gamma di soluzioni:

- Poltrona, con o senza braccioli
- Divani a due e tre posti, con o senza braccioli
- Panche imbottite in due profondità
- Tavolini rettangolari e quadrati

Ogni elemento è progettato per garantire coerenza dimensionale e configurabilità, sia come pezzi singoli sia in composizioni.

Il comfort è assicurato da un'imbottitura a densità differenziata, da un sistema di cinghie elastiche sotto la seduta che migliora le prestazioni ergonomiche e dalla raffinata esecuzione delle cuciture dei cuscini, che sottolineano l'eleganza sartoriale della collezione.

Particolare attenzione è dedicata alle finiture: le superfici lignee, disponibili in rovere spazzolato naturale o caffè, si abbinano all'intera gamma di tessuti Citterio, arricchita da un nuovo tessuto in lana proposto in quattro varianti cromatiche.

Il sistema si completa con piedini tondi cromati, che sollevano i volumi imbottiti e ne sottolineano il design elegante ed essenziale.
